Students recently completed a mini educational session related to the myths and health risks to E-Cigarettes and Vaping. Thank you to Dr. Shafer and Ms. Pool for leading this discussion with our students. As a school we continue to educate and learn about this unhealthy teenage habit. Please take the time to watch these two segments.

**Electronic Cigarettes and Vaping**

**Clearing the air on vaping: our kids, our schools, our community**

According to a recent National Youth Tobacco Survey, 20 percent of high school students admitted to using an electronic cigarette within the last 30 days, that's up more than 75 percent since 2017 and the American Academy of Pediatrics just called for a new effort to discourage kids from what's being called a crisis
